To panel members of the CERN Technical Student Programme,

Re: Miss Jennifer Arokia Doss

It is my great pleasure to write this letter of recommendation for Miss Jennifer Arokia Doss. We have known each other since July 2020. I was the unit chair of SIT102 Introduction to Programming subject in Trimester 2 2020. In the trimester, Jennifer demonstrated a strong programming capability to pick up complex concepts quickly. Jennifer has left me a deep impression with her intellectual and academic abilities, and I consider her as a brilliant student without reservation.

I am pleased to see the enthusiasm and insistence with which Jennifer managed her tasks and programming project(s) in her portfolio and how she engaged with our teaching team members for improving her programming and coding skills. The teaching team and Jennifer frequently discussed various design and development of structural and procedural programs, where Jennifer always demonstrated remarkable analytical abilities and originality of her ideas.

Jennifer is willing to learn and listen to suggestions. I believe you will find her an intelligent, hard-working, and dedicated person. It is my belief that Jennifer will realize her huge potential and grow into a prominent IT professional/programmer. If you have any questions regarding Jennifer character or achievements, please feel free to contact me.

Yours Faithfully,

18/05/2021
